1	Desktop agent installer window (q1 canvas area), completely hiding action buttons and preventing initial completion.	1. Open web with browser and navigate to the web browser address. 2. Click the "Download" button and download the web browser address. 3. Locate and click on the "Download" Agent module inside the left sidebar navigation menu. 4. Click on the "Download" button and download the web browser address. 5. Click on the "Download" button and download the web browser address. 6. Go to your local machine (Windows) and double-click the "Download" button to download the web browser address. 7. To verify the window appears to be installed, maximize it, use mouse clicking to close the window before the test begins.	1. User must have active login access to the web agent with profile. 2. Windows 10 OS environment or up to a standard hardware resolution (1920x1080).	The installer window should appear fully with all buttons, provide a visible "close" button, and be completely visible so that no confirmation/cancel buttons are hidden or inaccessible or clickable.	The desktop window installer appears with a slightly faded, shortened dimensions and the window title bar is not visible on the page content height. There is no visible "close" button, and the window title bar is not visible on the page content height. The window title bar is not visible on the page content height.	https://www.youtube.com/watch?v=... https://www.youtube.com/watch?v=...	Windows 10	Google Chrome Version 148.0.7776.119	1920 x 1080	Functional Testing	Low	Low	Pending	
2	"Download for macOS" action button is vertically misaligned compared to Windows and Linux icons.	1. Open web with browser and navigate to the web browser address. 2. Click the "Download" button and download the web browser address. 3. Click on the "Download" button and download the web browser address. 4. Click on the "Download" button and download the web browser address. 5. Click on the "Download" button and download the web browser address. 6. Click on the "Download" button and download the web browser address. 7. To verify the window appears to be installed, maximize it, use mouse clicking to close the window before the test begins.	1. User is viewed on a standard desktop screen resolution (e.g. 1920x1080).	All download action buttons should be perfectly aligned along the same horizontal baseline, regardless of the browser or OS.	The "Download for macOS" button is slightly offset from the Windows and Linux icons, the download for macOS button is slightly offset from the Windows and Linux icons, the download for macOS button is slightly offset from the Windows and Linux icons.	https://www.youtube.com/watch?v=... https://www.youtube.com/watch?v=...	Windows 10	Google Chrome Version 148.0.7776.119	1920 x 1080	UI/UX Testing	Low	Low	Pending	
3	Sticker menu background layout color of early, leaving large empty white space on the canvas area.	1. Open web with browser and navigate to the web browser address. 2. Click the "Download" button and download the web browser address. 3. Click on the "Download" button and download the web browser address. 4. Click on the "Download" button and download the web browser address. 5. Click on the "Download" button and download the web browser address. 6. Click on the "Download" button and download the web browser address. 7. To verify the window appears to be installed, maximize it, use mouse clicking to close the window before the test begins.	1. The user is logged into the web console and viewing long on a standard desktop screen resolution.	The navigation toolbar container should show download to 100% height, leaving empty white space on the canvas area.	The sticker menu background layout color of early, leaving large empty white space on the canvas area.	https://www.youtube.com/watch?v=... https://www.youtube.com/watch?v=...	Windows 10	Google Chrome Version 148.0.7776.119	1920 x 1080	UI/UX Testing	Low	Medium	Pending	
4	Filter controls and data preview wrap vertically and misalign on the Activity Log sidebar.	1. Open web with browser and navigate to the web browser address. 2. Click the "Download" button and download the web browser address. 3. Click on the "Download" button and download the web browser address. 4. Click on the "Download" button and download the web browser address. 5. Click on the "Download" button and download the web browser address. 6. Click on the "Download" button and download the web browser address. 7. To verify the window appears to be installed, maximize it, use mouse clicking to close the window before the test begins.	1. User is viewing the web panel on a standard desktop screen resolution.	All filtering tabs (Range, Status, From/To Date, Group, Website, and Search) should be aligned horizontally and wrap vertically.	The filter controls and data preview wrap vertically and misalign on the Activity Log sidebar.	https://www.youtube.com/watch?v=... https://www.youtube.com/watch?v=...	Windows 10	Google Chrome Version 148.0.7776.119	1920 x 1080	UI/UX Testing	Low	Medium	Pending	
5	Data filter components fragment layout spacing and wrap incorrectly on the Screenshots sidebar.	1. Open web with browser and navigate to the web browser address. 2. Click the "Download" button and download the web browser address. 3. Click on the "Download" button and download the web browser address. 4. Click on the "Download" button and download the web browser address. 5. Click on the "Download" button and download the web browser address. 6. Click on the "Download" button and download the web browser address. 7. To verify the window appears to be installed, maximize it, use mouse clicking to close the window before the test begins.	1. User is viewing the dashboard elements on a standard desktop screen resolution.	The entire filter bar menu should follow a clean, horizontally, uniform layout grid and wrap vertically.	The data filter components fragment layout spacing and wrap incorrectly on the Screenshots sidebar.	https://www.youtube.com/watch?v=... https://www.youtube.com/watch?v=...	Windows 10	Google Chrome Version 148.0.7776.119	1920 x 1080	UI/UX Testing	Low	Low	Pending	
6	"Remove Overlay" element in Alerts/Incidents Rules table button styling, appearing as a disabled state.	1. Open web with browser and navigate to the web browser address. 2. Click the "Download" button and download the web browser address. 3. Click on the "Download" button and download the web browser address. 4. Click on the "Download" button and download the web browser address. 5. Click on the "Download" button and download the web browser address. 6. Click on the "Download" button and download the web browser address. 7. To verify the window appears to be installed, maximize it, use mouse clicking to close the window before the test begins.	At least one alert/incident rule must have an active content configured.	The "Remove Overlay" button should be styled as an interactive button, not as a disabled button, and be visible on the canvas area.	The element is rendered using plain text, unstyled but the button (border) is standard and visible. This has a disabled, disabled and makes no contribution to the user's ability to interact with the button.	https://www.youtube.com/watch?v=... https://www.youtube.com/watch?v=...	Windows 10	Google Chrome Version 148.0.7776.119	1920 x 1080	UI/UX Testing	Low	Low	Pending	
7	Total screenshot count on Overview dashboard display "4" while only 3 screenshot rules visible in the Screenshots list.	1. Open web with browser and navigate to the web browser address. 2. Click the "Download" button and download the web browser address. 3. Click on the "Download" button and download the web browser address. 4. Click on the "Download" button and download the web browser address. 5. Click on the "Download" button and download the web browser address. 6. Click on the "Download" button and download the web browser address. 7. To verify the window appears to be installed, maximize it, use mouse clicking to close the window before the test begins.	At least 4 screenshot rules must have been tracked and tagged by the background agent when the dashboard page is loaded on the specified testing day.	The numerical analytical count on the Overview page must match the exact number of screenshot rules visible in the Screenshots page. Both elements should display 4 counts.	A data mismatch exists. The dashboard summary reports a total volume of 4, whereas the list of rules (screenshot rules) only returns 3 individual rules, incorrectly only counting the first rule.	https://www.youtube.com/watch?v=... https://www.youtube.com/watch?v=...	Windows 10	Google Chrome Version 148.0.7776.119	1920 x 1080	Functional Testing	Medium	Low	Pending	
8	Leave requests filter dropdown includes a "Cancel" option, but no action exists to cancel a request.	1. Open web with browser and navigate to the web browser address. 2. Click the "Download" button and download the web browser address. 3. Click on the "Download" button and download the web browser address. 4. Click on the "Download" button and download the web browser address. 5. Click on the "Download" button and download the web browser address. 6. Click on the "Download" button and download the web browser address. 7. To verify the window appears to be installed, maximize it, use mouse clicking to close the window before the test begins.	1. User is managing leave requests on the Requests list panel.	The "Cancel" button should be styled as a disabled button, and be visible on the canvas area.	The dropdown filter presents a disabled state. While "Cancel" is a selectable option, the actual user controls under the action column only allow a user to "Cancel" (close icon), "Request" (close icon), or "Delete" (trash icon). There is no function related to actually cancel a request.	https://www.youtube.com/watch?v=... https://www.youtube.com/watch?v=...	Windows 10	Google Chrome Version 148.0.7776.119	1920 x 1080	Functional Testing	Low	Medium	Pending	
9	Password input field has a visible visibility toggle icon on the Welcome Back login card.	1. Open web with browser and navigate to the web browser address. 2. Click the "Download" button and download the web browser address. 3. Click on the "Download" button and download the web browser address. 4. Click on the "Download" button and download the web browser address. 5. Click on the "Download" button and download the web browser address. 6. Click on the "Download" button and download the web browser address. 7. To verify the window appears to be installed, maximize it, use mouse clicking to close the window before the test begins.	1. User is on the unauthorized login landing screen.	An interactive "Toggle" icon should be present inside the right edge of the password input field, allowing the user to click to toggle between "show" and "hide" states.	The field is completely static. Characters are masked with dots with no element or function related to actually toggle the visibility of the password input field.	https://www.youtube.com/watch?v=... https://www.youtube.com/watch?v=...	Windows 10	Google Chrome Version 148.0.7776.119	1920 x 1080	UI/UX Testing	Low	Medium	Pending	
10	Activity Incidents and Screenshots metadata are hardcoded to AM hour, ignoring the user's local activity region.	1. Open web with browser and navigate to the web browser address. 2. Click the "Download" button and download the web browser address. 3. Click on the "Download" button and download the web browser address. 4. Click on the "Download" button and download the web browser address. 5. Click on the "Download" button and download the web browser address. 6. Click on the "Download" button and download the web browser address. 7. To verify the window appears to be installed, maximize it, use mouse clicking to close the window before the test begins.	1. Device clock state is accurately synchronized to the user's local time zone.	The activity grid, timeline data, and screenshot metadata timestamps should display the user's local time zone (e.g. EST/EDT) and not be hardcoded to AM hour on the machine.	The activity grid, timeline data, and screenshot metadata timestamps should display the user's local time zone (e.g. EST/EDT) and not be hardcoded to AM hour on the machine.	https://www.youtube.com/watch?v=... https://www.youtube.com/watch?v=...	Windows 10	Google Chrome Version 148.0.7776.119	1920 x 1080	Functional Testing	Low	Low	Pending	
UX Enhancement Suggestion: Add Content Capabilities for Captured Screenshots														
Type: Feature Request / Enhancement														
Description: Currently, if the agent background task captures a screenshot, it only stores the image data in the database. This is not ideal for users who need to review or share screenshots. The enhancement is to add a "Download" button to the screenshot list, which will allow users to download the screenshot to their local machine. This will be implemented as a new feature, and will require a														
Proposed Solution: Introduce a "Download" button on the screenshot list, which will allow users to download the screenshot to their local machine. This will be implemented as a new feature, and will require a

Implemented (Done)														
UX Enhancement Suggestion: Add Info Editing Capability for Pending Leave Requests														
Type: Feature Request / Enhancement														
Description: Currently, if a user selects the wrong leave type when clicking "Request" instead of "Cancel", they must delete the new entry or await approval. This is not ideal for users who need to review or share screenshots. The enhancement is to add a "Cancel" button to the screenshot list, which will allow users to download the screenshot to their local machine. This will be implemented as a new feature, and will require a
